Scientific and Technical Information Center

Requester's Full Name: William Boissier Examiner #: 67262 Date: 7/17  
Art Unit: 1744 Phone Number 308-4066 Serial Number: 10404154  
Mail Box and Bldg/Room Location: C03 7 E12 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.  
\*\*\*\*\*

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: \_\_\_\_\_

Inventors (please provide full names): \_\_\_\_\_

STG	-	(A) United States patent
AB	-	The invention concerns a test apparatus for the testing of a test sample on or in a material such as body fluids or food, particularly adapted to a bioluminescent test, such as for the detection of ATP or phosphatase or other materials. The test apparatus includes a transparent tube having at one end a sample unit and at the other end a detachable or nondetachable test unit which are connected, and which includes a cover with a probe containing a swab at one end. The test apparatus includes probe positioning marks on the exterior of the sample unit, so that the probe may be moved between selected test positions, and as it moves from a non-use to a use position, various test reagents which are sealed within the test unit are punctured by the probe, and the test sample and the test reagents are reacted together in the test unit.

Test apparatus, system and method for the detection of test  
samples

APPL-NO: 00093433

FILED-DATE: June 8, 1998

GRANTED-DATE: October 12, 1999

CORE TERMS: sample, reagent, probe, chamber, swab, cylinder, microtube, buffer,  
tablet, package ...

ENGLISH-ABST:

The invention concerns a test apparatus for the testing of a test sample on or in a material, such as body fluids or food, particularly adapted to a bioluminescent test, such as for the detection of ATP or phosphatase or other materials. The test apparatus includes a transparent tube having at one end a sample unit and at the other end a detachable or nondetachable test unit which are connected, and which includes a cover with a probe containing a swab at one end. The test apparatus includes probe positioning marks on the exterior of the sample unit, so that the probe may be moved between selected test positions, and as it moves from a non-use to a use position, various test reagents which are sealed within the test unit are punctured by the probe, and the test sample and the test reagents are reacted together in the test unit.

AB	-	A single use reagent chamber and a test apparatus for the detection of test samples, particularly by achemiluminescenttest. The chamber includes a cylinder sealed with probe-puncturable membranes into a sealed compartment with a reagent composition therein for the test used. The reagent chamber is used in a test unit of the test apparatus.

Reagent chamber for test apparatus and test apparatus

APPL-NO: 09396127

FILED-DATE: September 14, 1999

GRANTED-DATE: January 30, 2001

CORE TERMS: sample, reagent, probe, chamber, swab, cylinder, microtube, buffer, tablet, sealed ...

ENGLISH-ABST:

A single use reagent chamber and a test apparatus for the detection of test samples, particularly by a chemiluminescent test. The chamber includes a cylinder sealed with probe-puncturable membranes into a sealed compartment with a reagent composition therein for the test used. The reagent chamber is used in a test unit of the test apparatus.

Test apparatus, system and method for the detection of test  
samples

APPL-NO: 08619586

FILED-DATE: March 26, 1996

GRANTED-DATE: October 27, 1998

CORE TERMS: sample, reagent, probe, chamber, swab, cylinder, microtube, buffer,  
tablet, package ...

ENGLISH-ABST:

The invention concerns a test apparatus for the testing of a test sample on or in a material, such as body fluids or food, particularly adapted to a bioluminescent test, such as for the detection of ATP or phosphatase or other materials. The test apparatus includes a transparent tube having at one end a sample unit and at the other end a detachable or nondetachable test unit which are connected, and which includes a cover with a probe containing a swab at one end. The test apparatus includes probe positioning marks on the exterior of the sample unit, so that the probe may be moved between selected test positions, and as it moves from a non-use to a use position, various test reagents which are sealed within the test unit are punctured by the probe, and the test sample and the test reagents are reacted together in the test unit.
